

# Request for Proposals (RFP) - Medical Education Grants

## Addressing knowledge and competence gaps for the management of Chronic Inflammatory Demyelinating Polyneuropathy (CIDP)

argenx supports the global healthcare community's independent initiatives (e.g., research, quality improvement, and education) to improve patient outcomes in areas of unmet medical need that are aligned with argenx medical and scientific strategies. Through this RFP, it is our intent to support CME/CE programs in the following areas of interest.

### Areas of Interest

- Educate on pathophysiology of CIDP and improve diagnostic knowledge and competence
- Enhance knowledge and understanding about the role of IgG autoantibodies in CIDP pathogenesis and how FcRn antagonists target this process
- Advance competence in identifying suitable candidates for FcRn therapy, develop a personalized treatment plan through shared-decision making, considering dosing frequency, method of delivery, and inadequacies of traditional therapies
- Increase knowledge and competence on the transition of patients from traditional therapies (such as IVIG) to current and upcoming FcRn antagonists

### Program Format Considerations

- Preference will be given to innovative formats as recommended by educational provider (including satellite symposium at 2025 AANEM Annual Meeting)
- Enduring content for at least 12-months after launch of program

### Target Audience

- Minimum CME/CE requirement, 1 credit for all proposals
- Educational credits in North America
- Neurologists, neuromuscular specialists and APPs

### About argenx

Decisions for grants are made through a formal, grant review and decision-making process. The Grant Review Committee assesses and approves applications based upon need, design, scientific rigor, independence and compliance. Approvals depend on available funding, the volume of requests, and alignment with argenx's areas of interest.
